

HOW TO APPLY PERSPIREX

① APPLY TO DRY AND UNBROKEN SKIN

It is very important that your skin is completely dry and unbroken before application.

② APPLY AT NIGHT

Apply Perspirex at night before going to bed as the sweat glands are less active at night. When you start, use Perspirex every night, until you have achieved the desired effect - usually within 1 week. Allow Perspirex to dry fully after application.

③ WASH OFF IN THE MORNING

Wash off in the morning with soap and water. Do not re-apply as the effect will last even after a shower. Should you wish to, you can also apply a regular scented deodorant or perfume. This will not affect the efficacy.
